

Customer Journey Map

Date: 14 July 2026 | **Team ID:** | **Project Name:** Emotion Detection and Learning Support Engine

The customer journey map illustrates the complete experience of a student using the Emotion Detection and Learning Support Engine. It captures the user's actions, touchpoints, thoughts, feelings, process ownership, and improvement opportunities at each stage of interaction with the system.

Phase of Journey	Stage 1	Stage 2	Stage 3
Actions What does the customer do?	Opens the application and enters how they feel.	The system analyzes the text and predicts the user's emotion.	Reviews personalized learning guidance and analytics dashboard.
Touchpoint What part of the service do they interact with?	Streamlit web interface and text input area.	AI emotion detection model (BiLSTM), NLP preprocessing, prediction engine.	Learning guidance panel, confidence score, emotion log, analytics dashboard.
Customer Thought What is the customer thinking?	"I hope the system understands how I'm feeling."	"Is the detected emotion accurate?"	"These suggestions can help me improve my learning."
Customer Feeling What is the customer feeling?	Curious, hopeful, or slightly anxious.	Interested, engaged, and reassured by the prediction.	Motivated, confident, and supported in the learning process.

Process Ownership & Improvement Opportunities

Stage	Process Owner	Improvement Opportunities
Stage 1	User Interface & Input Module	Improve accessibility with voice input, mobile-friendly design, and clearer instructions.
Stage 2	NLP Preprocessing & BiLSTM Emotion Detection Model	Improve prediction accuracy by training on a larger dataset and incorporating transformer-based models such as BERT.
Stage 3	Learning Guidance & Analytics Module	Provide more personalized recommendations, real-time progress tracking, and interactive learning resources.
