

Project Executable Files

Date: 14 July 2026

Team ID:

Project Name: Emotion Detection and Learning Support Engine

This document contains the project submission checklist, project folder structure, deployment details, repository information, execution steps, and known limitations for the Emotion Detection and Learning Support Engine.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted (Yes / No / NA)
1	Complete Source Code Files	Yes
2	README	Yes
3	Setup Guide	Yes
4	requirements.txt	Yes
5	Database Schema	Yes
6	Environment Configuration File	Yes
7	Deployed Application URL (If Hosted)	No (Project not deployed)
8	APK / Executable Binary (If Available)	No (Not Applicable)
9	Dockerfile / Containerization Configuration	No (Not Applicable)
10	Test Files / Test Results	Yes
11	Demo Video / Walkthrough	Yes

Step 2: File / Folder Structure

```
Emotion-Detection-Learning-Support-Engine/  
├── App/  
│   └── app.py  
├── Dataset/  
│   └── dataset.csv  
├── Logs/  
│   └── emotion_logs.csv  
├── Models/  
│   ├── bilstm_model.h5  
│   ├── tokenizer.pkl  
│   └── label_encoder.pkl  
├── ERDiagram.png  
├── README.md  
└── requirements.txt
```

Step 3: Deployment / Access Details

Field	Details
-------	---------

Hosted / Deployed URL	Not Deployed
Login Credentials	Not Applicable
Platform / Hosting Provider	Not Applicable
Repository Link	https://github.com/dwarampudilasya-rgb/Emotion-Detection-Learning-Support-Engine
Demo Video Link	Submitted along with project documentation.

Step 4: Run Instructions

System Requirements: Windows 10/11, Python 3.11 or above, Internet connection (optional), Minimum 8 GB RAM.

Installation: pip install -r requirements.txt

Run the Project: streamlit run App/app.py

Open the localhost URL in your browser, enter your feelings, and click "Detect Emotion".

Step 5: Known Issues & Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	Project is not deployed to a cloud platform.	Run locally using Streamlit.
2	Gemini API requires a valid API key.	Rule-based guidance used if key unavailable.
3	Initial application startup may be slow.	Wait for BiLSTM model to load.
4	Limited predefined emotions.	Future enhancement for more training.
