
Communication Plan: Emotion Detection and Learning Support Engine

Date: 14 July 2026

Team ID:

Effective communication is essential for a successful project demonstration. This document outlines the communication strategy used individually and with stakeholders throughout the project lifecycle, including how updates, issues, and feedback were managed.

Communication Plan

S.No	Communication Type	Frequency	Channel / Tool	Participants	Purpose
1	Daily Self Progress Review	Daily	Personal Notes / VS Code	Self	Track daily development progress
2	Project Development Updates	As Required	GitHub	Self	Maintain version control
3	Mentor/Faculty Guidance	Weekly	Google Meet / In-person	Student & Faculty Mentor	Receive technical guidance
4	Documentation Review	As Required	MS Word / PDF	Self	Update documentation
5	Testing & Bug Tracking	During Testing	Streamlit, VS Code	Self	Fix implementation issues
6	Final Project Review	Before Submission	In-person	Student & Faculty	Verify project readiness

Communication Challenges & Resolutions

S.No	Challenge Faced	Resolution / Action Taken
1	Working individually	Planned tasks independently and followed a structured schedule.
2	Limited development time	Prioritized core features and followed strict deadlines.
3	Debugging model predictions	Performed repeated testing and validation using inputs.

4	Documentation preparation	Organized documentation phase-wise and updated reports systematically.
5	Integrating technologies	Followed modular development and tested each component independently.
