
Demonstration of Proposed Features: Emotion Detection and Learning Support Engine

Date: 14 July 2026

Team ID:

This document captures all the features that were proposed during the project planning phase and tracks whether each feature was successfully implemented and demonstrated. It serves as evidence of the ability to deliver on the proposed solution.

Demonstration of Proposed Features

S.No	Feature Name	Description	Status	Demonstrated	Remarks
1	Emotion Detection	Detects user emotion from text using the trained BiLSTM model.	Implemented	Yes	Successfully demonstrated.
2	Text Preprocessing	Cleans, tokenizes, and pads user input before prediction.	Implemented	Yes	Working as expected.
3	Confidence Score	Displays prediction confidence percentage.	Implemented	Yes	Confidence shown for every prediction.
4	Primary & Secondary Emotion	Displays the most probable and secondary emotions.	Implemented	Yes	Successfully demonstrated.
5	Personalized Learning Guidance	Generates learning suggestions using Gemini AI/fallback.	Implemented	Yes	Guidance displayed correctly.
6	Emotion Log Storage	Saves prediction details with timestamp in a CSV file.	Implemented	Yes	Logs generated successfully.
7	Analytics Dashboard		Implemented	Yes	

		Displays emotion distribution and history.			Dashboard updates using log data.
8	User-Friendly Streamlit Interface	Interactive web interface for visualization.	Implemented	Yes	Responsive and easy to use.

Feature Implementation Summary

Metric	Value
Total Features Proposed	8
Total Features Implemented	8
Total Features Demonstrated	8
Overall Implementation Rate (%)	100%

All planned project features have been successfully implemented and demonstrated. The application performs emotion detection, provides AI-assisted learning guidance, maintains prediction logs, and visualizes results through an analytics dashboard. The project satisfies the intended objectives and is ready for demonstration and evaluation.
