
Project Demo Planning: Emotion Detection and Learning Support Engine

Date: 14 July 2026

Team ID:

A well-structured demo plan ensures that the project is presented effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities.

Project Demo Planning

S.No	Demo Section	Description	Duration (Mins)	Responsible Member
1	Introduction	Brief introduction to the project, objectives, and motivation.	1	Lasya Dwarampudi
2	Problem Statement	Explain learning challenges addressed and the need for support.	1	Lasya Dwarampudi
3	Solution Overview	Present architecture, workflow, technologies, and modules.	2	Lasya Dwarampudi
4	Live Feature Demonstration	Demonstrate prediction, confidence, guidance, and dashboard.	4	Lasya Dwarampudi
5	Project Summary	Summarize implementation, results, and future enhancements.	1	Lasya Dwarampudi
6	Question & Answer Session	Address evaluator questions and provide explanations.	1	Lasya Dwarampudi

Demo Flow Summary

Step	Activity	Notes
1	Introduction and Problem Statement	Introduce project, motivation, objectives, and problem solved.
2	Solution Overview	Explain workflow, architecture, technologies, and approach.
3	Live Feature Demonstration	Show emotion detection, confidence, guidance, and dashboard.

4	Results and Key Features	Highlight implemented features, outputs, and achievements.
5	Future Enhancements	Discuss improvements (cloud, BERT, multi-language, mobile).
6	Q&A Session	Clarify evaluator questions and conclude demonstration.

The project demonstration is planned to provide a structured overview of the complete system, beginning with the problem statement and ending with the live demonstration of implemented features. The planned flow ensures that evaluators can clearly understand the project objectives, implementation, functionality, and outcomes within the allocated presentation time.
