
Team Involvement in Demonstration: Emotion Detection and Learning Support Engine

Date: 14 July 2026

Team ID:

This document records the active participation and roles of the student during the project demonstration.

Team Involvement in Demonstration

S.No	Team Member Name	Role in Demo	Section Presented	Contribution Summary	Participation
1	Lasya Dwarampudi	Project Developer & Presenter	Complete Project Demonstration	Responsible for design, implementation, model integration, testing, documentation, GitHub management, and final presentation.	100%

Next Steps

- Gather feedback from project evaluators.
- Improve prediction accuracy using advanced deep learning models.
- Deploy the application on a cloud platform.
- Extend support for multilingual emotion detection.
- Enhance analytics and personalized learning recommendations.

Team Coordination Notes

Aspect	Details
Team Leader / Coordinator	Lasya Dwarampudi (Individual Project)
Overall Team Coordination Rating (1-5)	Excellent (5/5)
Any issues during demo	Minor prediction inconsistencies identified during testing and resolved before final demo.
How issues were resolved	Conducted repeated testing, verified workflow, improved UI presentation, validated logging, and ensured core functionality.

The project was independently designed, developed, tested, documented, and demonstrated by a single student. All planned project modules were successfully implemented, integrated, and

presented during the final demonstration. The project met the intended objectives and demonstrated the practical application of Artificial Intelligence and Natural Language Processing for emotion-aware learning support.
